⚠️ **Please remember:** your modem/router must always be switched on to enable your telephone to work.

1 Connect one end of the provided Ethernet cable to the Internet (blue) port. Connect the other end directly to your broadband modem/router.

2 Connect one end of a phone cable to the "Phone 1" (gray) port. Connect the other end to your analog phone.

3 Connect the provided power adapter to the "Power" port.

* You can find more information on the guide provided with the CISCO adapter.
