## Gigaset IP telephone

 **Please remember:** your modem/router must always be switched on to enable your telephone to work.

- 1** Prepare the handset: insert the batteries.
- 2** Connect the charging cradle to the main power supply to charge the batteries.
- 3** Connect the phone cable and power cable to the base.
- 4** Connect the base to the telephone network and the main power supply.
- 5** Connect the base to the router for accessing the Internet.
- 6** Connect PC to the router (optional).

\* You can find more information on the guide provided with the Gigaset IP telephone.
